Major Routes Prairie Passage Trail

This trail follows Hwy 75 to Crookston then goes down Hwy 102 to connect with Hwy 32 in Fertile traveling south.

This trail represents remnants of native grasses in six states and Canada. Native plantings are encouraged to restore the original landscape. The Prairie Passage has been described as a "window to the past." and "a place to get a sense of what this part of Minnesota used to be like."

Major Routes Red Lake River Corridor

www.redlakerivercorridor.org

Because of its unique setting and character, the Red Lake River is one of a few officially designated DNR canoe and small boat routes in the region.

The Red Lake River originates in the marshes of the Lower Red Lake and meanders west almost 200 miles before emptying into the Red River at East Grand Forks. It passes through three continental biomes, farmland, prairie, riparian forests, and bluffs. Fish populations include channel catfish, northern pike, and walleye. Campsites are designated along the route. Public rest areas are available along the route to picnic, rest, and explore.

Major Routes Red River Corridor

<http://www.dnr.state.mn.us/watertrails/index.html>

The Red River of the North is designated as an official canoe and boating route. The designated portion of the river is 394 miles long from Breckenridge to the US/Canadian border.

The Red River meanders 550 miles northward from its source in Breckenridge, MN to Lake Winnipeg in Canada. The Red River is known for its catfish and walleye populations. The Red River flows through the Red River Valley, one of the world's flattest landscapes and a remnant of glacial Lake Agassiz.

6 miles NW of Roseau on County Road 123

Snowmobiling legal on this WMA. No groomed trails.

Currently 6,000 acres with ongoing acquisition of adjoining land in order to complete the WMA and flood control project. Roseau Lake was drained in the early 1900's. Prior to drainage the area had a rich history of wildlife use and public recreation use. The lake remains drained yet today except during wet periods when the Roseau River overflows its banks and re-floods the original lake basin. Wildlife use of the area fluctuates dramatically with the water levels. It can be a good area to observe shorebirds and other wetland related wildlife during migration some years.
